

DRIVE IN PALLET RACKING

Efficient - Ergonomic - Compact

Modular

LIFO

75% more storage

About Us

Godrej Storage Solutions is a part of the renowned Godrej group, a global conglomerate with businesses ranging from consumer products to aerospace engineering. We are a pioneer, visionary and market leader since last 6 decades in the field of warehousing storage systems in India. With innovation, adaptability and reliability as our core strength, we have created more than 200 million square feet of state-of-the-art storage systems for various sectors ranging from E-commerce to 3PL since the beginning of this century.

Our culture of continuous learning coupled with decades of experience in the field of intralogistics has enabled us to design best-in-class solution to serve all storage needs.

About the product

Our Drive-in systems consist of interconnected blocks without aisles designed for bulk storage of palletized loads. Our Drive-in solution is a part of our dense storage offering that helps our clients to achieve maximum utilization of cubic space.

Each storage bay is only one pallet wide and designed to store pallets multiple levels high with variable depth to suit the need. The structural elements are designed and manufactured in consultation with coven associates, enabling safe storage and retrieval operations of palletized goods.

The forklift truck can drive right in to the storage bay and place or retrieve the pallets as required. Special guide rails ensure safe, fast and accurate positioning of Forklift truck. Depending on the design, our Drive-in system can be accessed from one or both the ends, enabling the user to follow last-in-first-out (LIFO).

APPLICATIONS

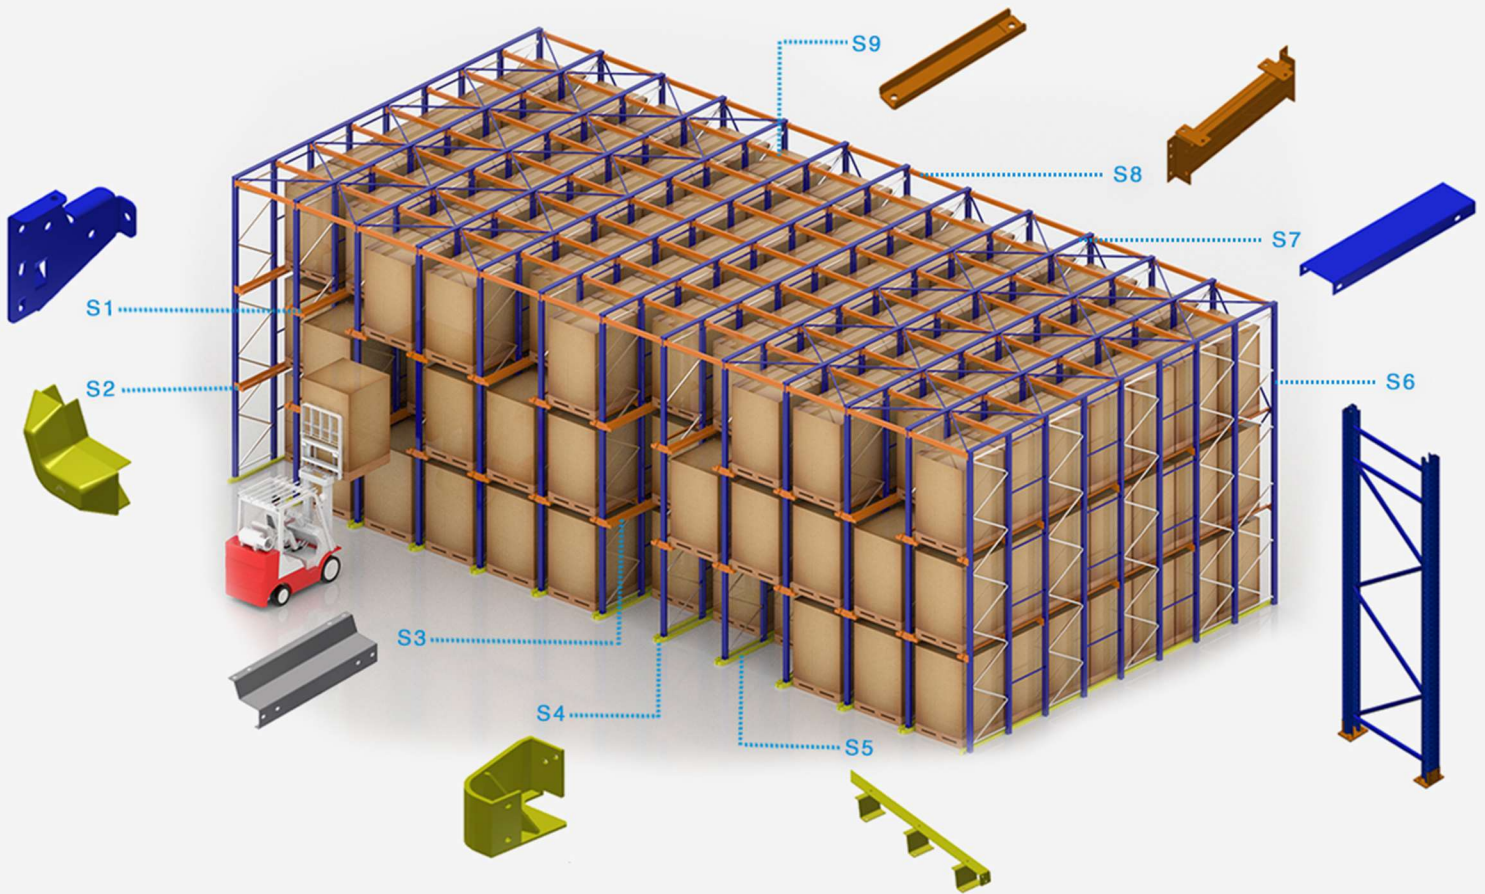

- FMCG
- Consumer Durables
- Paints
- Chemicals
- F & B
- Apparel
- Automobile/ Auto ancillary units
- Energy/Power
- Engineering

FEATURES

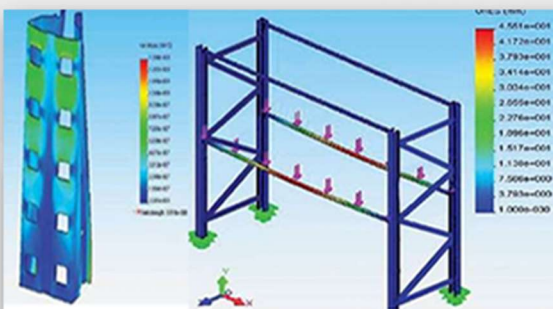

- ◆ Achieves 75% more storage space than traditional selective pallet racking systems
- ◆ Dense Storage System ideal for cold storage applications
- ◆ Suitable for Last-in-first-out (LIFO)
- ◆ Modular system enables ease of re-configuration
- ◆ Ideal for warehouses with homogenous goods or seasonal goods
- ◆ Achieves good stock rotation
- ◆ Higher grade steel with higher yield strength enables safe and sturdy storage system
- ◆ Can be handled with Reach Trucks or Forklifts
- ◆ Wide range of safety accessories to ensure operator and material safety.

CONFIGURATION

Basic Elements		Accessories
S1 Support Brackets	S6 Frame Assembly	Label Holder
S2 Entry Guide	S7 Top Bracing Channel	Safety Precaution Notice
S3 Pallet Rail	S8 Top Stability Beam	
S4 Entry Guide Rail	S9 Bracing	
S5 Guide Rail		

Our accumulated knowledge coupled with cutting edge design tools help us design and analyse each component ensuring reliability

Well equipped and dedicated in-house lab enables us to conduct experiments and perform validation to comply with all global standards

THE GODREJ ADVANTAGE

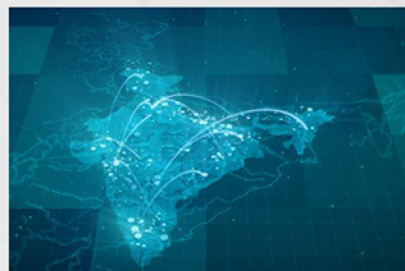

State-of-the-art, high-capacity automated manufacturing facility

Comprehensive in-house testing facility for assured quality

Tested seismic racking

13 branches & 75+ channel partners serving all locations across the country

WHY GODREJ?

**YOUR
RELIABLE
PARTNER**

Best in Quality
&
Innovative Design

of Steel

of Solution

Quick & Safe
Project Execution

Committed to Safety
Timely handover

Life Cycle Support

Rack Audit
Repair & Modification
Relocation

Racking Solutions

Mobile Pallet Racking

Shuttle Pallet Racking System

Double Deep Pallet Racking

Very Narrow Aisle Pallet Racking System

Selective Pallet Racking

Our solutions, perfected with years of experience and our highly trained installation team, backed with world-class production facility enable us to provide our clients with superior storage solutions.

You are one call away from your perfect racking partner
